

See what an audit can show you.

www.digittrix.com | Scan recorded 20 September 2026

This excerpt uses real findings from our own website. It demonstrates the report format; it is not a client success story or a claim about the website today.

40 pages checked | 0 issues | 45 checks to review

Counts are individual checks. A review flag needs a human decision and may reflect an intentional setting.

Area	Issues	Review	Passed	N/A	Coverage
On-Page SEO	0	38	438	44	520 checks
Off-Page SEO	-	-	-	-	Not measured
AI Search	0	0	80	0	80 checks
Page Speed	-	-	-	-	Not measured
Schemas	0	0	40	0	40 checks
Links	0	0	40	0	40 checks
Technical SEO	0	0	126	0	126 checks
Mobile Usability	0	7	45	0	52 checks

Coverage of this archived sample

Public pages and selected rendered layouts were checked. AI Search here means crawler access, not measured AI mentions. Backlinks and search rankings were not measured. This September 20 snapshot predates our PageSpeed integration; its speed result is unavailable, not zero.

TWO OBSERVED FINDINGS

A finding. A reason. A practical next step.

Social share metadata

REVIEW NEEDED | <https://www.digittrix.com/contact-us>

Observed: Not found: og:image.

Why it matters: Share metadata helps social platforms build a useful preview when someone shares a URL.

Recommended next step: Provide a page-specific share title, description and a publicly accessible image, then preview the URL in the platform's sharing debugger.

Title and heading topic alignment

REVIEW NEEDED | <https://www.digittrix.com/contact-us>

Observed: No shared meaningful words between the title and main heading. Title: Contact Digittrix Infotech | Best Web and App Development; heading: We'd love to hear from you.

Why it matters: Title and main heading should describe the same offer or subject. Shared words are a narrow indicator, not semantic proof.

Recommended next step: Review both together for the intended query. Synonyms can be valid; rewrite only when the page promise is unclear.

Check your own website
